MEETING PLACE

Hill Country Turners meet in the basement of the KACC (Kerr Arts & Cultural Center) at 228 Earl Garrett, Kerrville, Texas at 6:30 pm on the 2nd Thursday of the month, **unless otherwise notified.**

June Meeting

Uel Clanton will be turning a Texas Toothpick this meeting. Don't ask me, I'm just the messenger.

May Meeting

Keith Longnecker gave us pointers on split turning. You know, glue some sticks together with paper between them, turn away everything that looks like a backward center, split it along the paper joint and re-glue it backwards. Keith showed us some nice looking stuff he made. Here is Keith.

Here is also an example of how to reinforce the original paper-glued structure with a ring to prevent premature splitting if you don't use a cup center.

Thanks Keith, my next project, a split turning, is already planned.

Bringback Pictures

Show and Tell

Highlights were the beautiful bowls of James Johnson, who found a most beautiful box elder tree and made the most of it. Also featured were Harold Dykes (with his amazing segmented, turned and carved bowl) and Joe Johnson (with his small gems from small branches). Here they are again.

Extra Show and Tell: Will Aymond put together a dust collector hood for his shop and says " I bought these parts locally and put it together in 1 afternoon, works great as it can be moved easily the full length of the powermatic lathe. If someone is interested they can come to my shop and check it out. I will be glad to tell them where I got all the parts. I will be glad to help them assemble one if they need help. " I was impressed with his use of the safety cage support to hold the sliding hood.
