Issue #4

**April 8, 2010**

**Watch out guys. This is the earliest time of the month for a meeting!**

## **MEETING PLACE**

**Hill Country Turners** meet in the basement of the KACC (Kerr Arts & Cultural Center) at 228 Earl Garrett, Kerrville, Texas at 6:30 pm on the 2nd Thursday of the month.

## **April Meeting**

Vern Hallmark is going to incorporate PVC into turnings. It seems that PVC is used for lots of things besides plumbing. So far I have seen it in jam chucks, tools to cut foam disks for sanding, a mandrel for holding hollow forms for finishing and in James Johnson's holder for cutting logs. It will be interesting to see it incorporated into a turning.

## **February Meeting**

Raúl Peña showed us some of his tools to make pens and captured rings. Chuck Felton captured his lineup after the meeting. As you can see, the scale of these tools is rather small, but, as with most of our stuff, the whole thing is based on larger tools that

one can make or buy. I was impressed by the idea of shortening some of the longer tools with an adjustable screw. I also liked boring through the piece in order to assure centering the pen. Thanks Raúl.

## Show and Tell – and Farewell?

Vern Hallmark and Uel Clanton were the only participants in the show and tell. Vern showed us a nice pecan bowl that, for a rim, added a layer of walnut segments that went very well with the color of the pecan. Uel showed another African fly swisher, a particularly long one that was once the property of a lovely gemsbok buck. This brings us to the pictures and the “and Farewell?” part. The first picture is Vern’s bowl. The second is Uel’s fly swisher held by Barbie Holton. The third picture is Jimmy Holton. We were dismayed to find that Barbie and Jimmy have moved to north Texas and we will be seeing much less of them in the future. Jimmy is a past president of HCT and Barbie the treasurer, Barbie and Jimmy have been helpful to our club for many years. We will miss them and hope they will be back a lot.
